RE: Site Inspection, William Foster/Bryon Holloway, Trout Creek Project, S/023/045,  
Juab County, Utah

Date of Inspection: July 9, 1996  
Time of Inspection: 1545 - 1610  
Conditions: cloudy, warm  
Participants: Tony Gallegos, Tom Munson, DOGM

Purpose of Inspection: To examine the project site while in the area

The small mine notice on file with the Division describes this project as small scale recreational dredging for the 1995 calendar year with the possibility of the operator renewing for 1996. The notice shows one of the two project areas as being along Trout Creek downstream from the gaging station in section 28, T12S, R18W. The other area is along Birch Creek downstream of the WSA boundary. The bank along Trout Creek was examined for approximately 50 yards below what is believed to be the gaging station location. There were no visible signs of dredging impacts along this portion of the stream. There were several campsite related disturbances in this area and minor amounts of litter.
